Dear ABHAYAans

Good Day and Greetings from ABHAYA. Hope you are all aware of the recently concluded operation of Ms. Priyanka to whom Doctors successfully performed cochlear Implantation couple of weeks ago. When we shared the story of Priyanka with all for information, surprisingly we received couple of similar cases seeking our help for such surgeries. On enquiry we understand that there are about 25 such cases (only known ones) kept under pendency with SAHI due to non availability of funds at patient's end.

Dr. Ratnakar Kamaraju forwarded a request to ABHAYA couple of days ago seeking our support which is as follows:

Dear Balachandra,

I find the God's work being carried out silently and fruitfully. I appreciate and May Lord Sai bless you all.

By the way, I think I can share with you some small but important issue. Mr Purnachandradu who was my personal secretary at NIMS hails from a poor agriculturist family and with all my (HIS) guidance, he completed MA and a wonderful Steno typist of NIMS (even today). Unfortunately he has been blessed by three sons, eldest having bilateral nerve deafness of (98 and 90% respectively which was slow and progressive. Dr Vinay kumar of Apollo, our good friend had assessed and advised Cochlear transplant. I may share little more details. Being the eldest and bright in mathematics, the boy secured good marks in entrance. My daughter educated this boy and now he is an engineer in computers and electronics. He cannot be usefully employed because of his ailment.

We all pooled including father's provident fund to raise nearly about Rs. 3.00 lakhs. The balance has become difficult. Dr. Vinay kumar said through SAHI they would perform surgery with their sanction of partial amount if the patient is able to arrange for the rest. I wish people like you can do something for this sort of issues.

The boy being an engineer may be employed and recover treatment charges, from his salary in installments, even as apprentice. Father getting about Rs. 13,000/- PM after all cuts and with two more sons to be educated, finds extremely difficult to afford. After having got him educated to this level both our daughter and I feel sad. See what best we can do in this situation.

Kindly do not construe, as I do not like our relationship to come in any way with this. I will like to have your feedback.

Dr. Kamaraju Ratnakar

Abhaya Foundation

On receipt of the information we called both Mr. Purnachandrudu and his son Mr.Sathya Srinivas BE(CSE) who is otherwise able to the office and interacted with them. Sathya looks to be very intelligent to understand the people. Apollo suggested for Cochlear implant surgery for him, whose cost would be about Rs.8,00,000/- . We understand from his father that right now they have about Rs.3,00,000/- which is being pooled. SAHI sanctioned about Rs.1,00,000/- they are now approaching CM to provide an appropriate relief which we may assume would be around Rs.1,00,000/-. All these things pooled together they will have about Rs.5.00 lakhs and they are looking for the support for the rest of the amount.

The top Priority now for them:

Mr.Purnachandrudu says if his son is able to get an appropriate employment based on his qualification and abilities it would be of grate help for them so that they can raise a loan to the extent possible and get the same repaid by his monthly salary in installments. in case if anyone in the circle is able to provide him a chance to work considering his abilities he would be morally boosted in the life and built confidence to face the world around. We request the employers to consider this candidate with at least a salary of Rs.7500/- PM to start with.

In any case if we all agree that we should help him, then we should pool at least about Rs.2.00 lakhs for his surgery. abhaya is ready with Rs.25,000/- from its side to start with. We look forward to have your kind hearted support in the said regard.

If every thing goes smoothly with God's Grace...
we are sure of doing the needful to Satya by 05-05-09.
look forward to see your loving and caring action...
Remember even if we want to cross 1000 miles ... It would still start with 1 foot only...
If every step added...even 1000 miles can be crossed with out any difficulty.
Let you and me together be of some help to Satya.

Father - Purnachadrudu
